Google Developer Student Club
- Zoom Marathon Challenge**  
Masai

# Vikram Kalra

## Full Stack Web Developer

## Professional Summary

Motivated Full Stack Web Developer with expertise in JavaScript and the MERN stack. Skilled in designing and implementing efficient server-side APIs and creating seamless frontend components using React.js. Strong problem-solving abilities and attention to detail. Excellent communicator and collaborator, eager to contribute to a dynamic team environment.

## Experience

- |   |                         |
|---|-------------------------|
| <b>CleanKoding</b>   Frontend Developer | May 2024 - October 2024 |
|---|-------------------------|
- Designed and developed React components for a browser extension, ensuring responsiveness and functionality to improve user engagement.
  - Integrated RESTful APIs to enable seamless data exchange between front-end and back-end systems, contributing to enhanced application performance.
  - Collaborated with team members to implement user-centric features and maintain code quality, leading to a reliable and robust web application.

## Projects

- |                     |                                |                                  |
|---------------------|--------------------------------|----------------------------------|
| <b>Myntra Clone</b> | <a href="#">Live Demo Link</a> | <a href="#">Github Repo Link</a> |
|---------------------|--------------------------------|----------------------------------|
- JavaScript
  - React
  - Node.js
  - Express.js
  - MongoDB
  - RESTful APIs
  - CSS3
- Developed a full-featured web application using the MERN stack, focusing on responsiveness and user interface design.
  - Implemented server-side APIs, user authentication, password hashing, and cart functionality using Node.js and Express.js.
  - Ensured seamless frontend-backend integration and enhanced user experience with React.js and Chakra UI.
  - Utilized MongoDB for database management and efficient query design.
  - Conducted thorough testing and debugging to ensure application reliability and stability.

- |                            |                                |                                  |
|----------------------------|--------------------------------|----------------------------------|
| <b>Fathom Health Clone</b> | <a href="#">Live Demo Link</a> | <a href="#">Github Repo Link</a> |
|----------------------------|--------------------------------|----------------------------------|
- React
  - JavaScript
  - Responsive Web Design
  - Git
  - CSS3
- Developed a frontend clone of the Fathom Health website using React.js and Chakra UI.
  - Showcased skills in responsive web design with a focus on UI/UX best practices.
  - Implemented features for dynamic content display and user interaction.
  - Demonstrated proficiency with version control systems like Git for collaborative development.
  - Gained experience with React.js components and library usage for efficient frontend development.
