Career Objective

Motivated Full Stack Developer and startup founder with experience building scalable SaaS and data-driven products from concept to deployment. Skilled in React, Next, TypeScript, Node.js, cloud infrastructure, database design, and ETL pipelines, with hands-on experience leading end-to-end product development. Passionate about solving real-world problems through technology and continuously learning modern software engineering practices.

Education

Rungta College of Engineering & Technology, CSVTU
B.Tech. in Computer Science (Data Science) — Percentage: 70.14% Aug 2023 – Sept 2027

New Era Progressive School
Higher Secondary Education Apr 2021 – Apr 2023

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python
Core Subjects: Object Oriented Programming, DBMS
Frameworks/Libraries: Next.js, React.js, Node.js, Express.js, Tailwind CSS
Databases: PostgreSQL, MongoDB, Supabase, ClickHouse
Tools & Platforms: Git, GitHub, Linux, DigitalOcean, Vercel, REST APIs, VPS

Experience

Datacrecy — Co-Founder & CTO Jun 2025 – Present

- Built and launched a B2B Data-as-a-Service platform, owning the entire engineering stack from infrastructure to product delivery.
- Developed the customer-facing website, SaaS application, admin portal, and SEO-driven people pages using Next.js, TypeScript, and modern web technologies.
- Architected and managed cloud infrastructure using DigitalOcean, ClickHouse, Supabase, and Resend, handling analytics, backend services, authentication, and email workflows.
- Designed and automated end-to-end ETL pipelines for ingesting, enriching, and serving business intelligence data at scale.

CleanKoding — Frontend Developer May 2024 – Oct 2024

- Designed and developed React components for a browser extension, ensuring responsiveness and improved user engagement.
- Integrated RESTful APIs to enable seamless communication between frontend and backend systems.
- Collaborated with team members to implement user-centric features and maintain code quality.
- Contributed to building a reliable and robust web application through testing and optimization.

Projects

My Wallet — MERN Stack, MUI Live Demo | GitHub

- Developed a full-stack personal finance management application to track income, expenses, and financial insights.
- Built an interactive analytics dashboard with visualizations for spending patterns and financial breakdowns.
- Implemented secure authentication using JWT, Google OAuth, and HTTP-only cookies with cross-origin session management.
- Designed a modular backend architecture and deployed the frontend on Vercel for production use.

Myntra Clone — MERN Stack Live Demo | GitHub

- Developed a full-featured e-commerce web application using MongoDB, Express.js, React.js, and Node.js.

- Implemented user authentication, password hashing, shopping cart functionality, and RESTful APIs.
- Ensured seamless frontend-backend integration and enhanced user experience using React.js.
- Utilized MongoDB for efficient database management and query optimization.
- Conducted testing and debugging to ensure reliability and stability.

Certifications

- Data Analytics – Intermediate Level (Coding Spoon)
- Masai Full Stack Developer Course
- Google Cloud Study Jams

Achievements

- Winner – MVP in a Day Contest

Soft Skills

Communication, Team Collaboration, Problem Solving, Adaptability, Leadership, Self-Learning
